

Sensational ease of use
through clever technology!

Changing presser feet is a snap

Thanks to snap on/off convenience you can change all presser feet in seconds, no matter if you're using the blind hem foot, beading foot, elastic foot...

Easy threading

The QuantumLock® makes it incredibly comfortable to work with several threads: With color-coded threading paths and effortless threading of cover hem and lower loopers.

Rolled hem without presser foot change

Switching to rolled hem position is all you need to do for sewing fine rolled hems with the QuantumLock®. There's no need to change the presser foot or stitch plate!

Adjustable presser foot pressure

If the presser foot pressure is too high, it can leave marks on fine fabrics. If the pressure is too low, you don't get neat results. The QuantumLock® lets you adjust the presser foot pressure – for perfect results every time!

For the final professional touch:

The QuantumLock® offers a fantastic range of stitch programs!

Double Chain Stitch
For durable industrial seams on all heavy fabrics. Also used as decorative stitch for stunning effects!

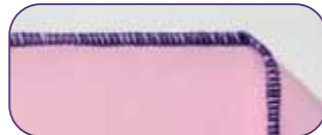

4-Thread Safety Stitch
The thread-saving version that sews, trims and finishes all heavy fabrics in one easy operation.

5-Thread Safety Stitch
As used by the garment industry: A combination of chain stitch and overedge seaming – ideal for heavy fabrics such as denim, corduroy.

5-Thread Safety Stitch (narrow)
Professional finishing for non-stretch, fine fabrics with the narrow version of the safety stitch.

2-Thread Rolled Hem
Thread-saving rolled hem for fine materials.

2-Thread Overedge Stitch
Beautifully flat: Used as edge finish, blind hem or for overcasting fine fabrics.

3-Thread Overlock Stitch
Guaranteed no fraying of fabrics: The perfect seam finish for all fabric types.

3-Thread Flatlock Stitch
Perfect for extremely flat, joined or lapped seams on cuffs or hems. Looks great with decorative threads!

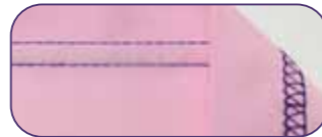

3-Thread Rolled Hem
The classic rolled hem for silk scarves, fine skirt hems with trendy lettuce edge, and much more.

3-Thread Stretch Mock Safety Stitch
The thread-saving version for seaming light, stretchy materials.

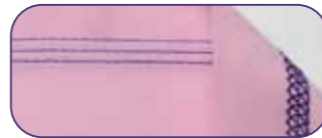

4-Thread Ultra-Stretch Mock Safety Stitch
The fast, durable safety seam for all stretch materials.

Double Cover Stitch
Beautiful parallel hemming as known from the best ready-to-wear: From T-shirts to casual wear.

Double Cover Stitch (narrow)
The narrow hemming version for lightweight materials. Also used for sewing decorative tucks.

Triple Cover Stitch
Highly elastic, durable seams for sportswear, corsetry, or swimwear. Exquisite seams can be produced with decorative threads!

SINGER®

Dream Seams!

Spicing up fabrics with new ideas:
The SINGER® QuantumLock® handles all fabric types with ease and precision and lets you create the most beautiful effects.

The New QuantumLock® 967

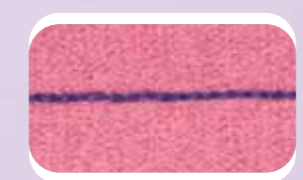

It's more fun to sew like the professionals!

Sewing with a serger? It instantly suggests practical and time-saving finishing of stretch fabrics and extremely flat-finished seams on difficult materials. That's absolutely right! The SINGER® QuantumLock®, however, lets you do much more than simply sewing, cutting and finishing: The vast range of professional stitch programs perfectly copes with all modern materials, letting you venture any sewing project you have been dreaming about. An absolute highlight is the 2-3-4-5-thread system of the QuantumLock® that even produces those stitch types usually found on designer fashion. With even better results than the garment industry!

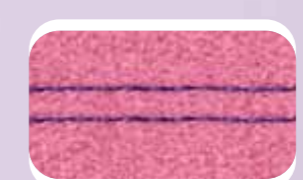

Not only fashion wants an optimal finish. That's why the SINGER® QuantumLock® is your ideal partner for every sewing project. From trendy accessories, cozy home textiles, to personalized gift ware: A serger offering this kind of versatility will spark off new ideas every time you're using it. And you'll be amazed at its easy handling, too. In fact, the QuantumLock® is so easy to use that even beginners will succeed at their very first try!

Safety Stitch
The garment industry uses this seam for non-stretch fabrics. Strong seaming and finishing in one easy step – because it's fast and extremely durable!

Chain Stitch
Suitable for durable straight seams – and for stunning decorative topstitching.

Cover Hem
Finishing and topstitching in one simple operation: The fastest way to sew a perfect seam.

Rolled Hem
Sewn with 2 or 3 threads: Rolled hems are ideal edge finishings for fine silks and other light materials. Precious effects can be achieved with decorative threads!

QuantumLock® 967

The extra-class serger that makes you an expert!

Honestly self-sewn?

You'll hear this question more often if you're sewing with the SINGER® QuantumLock®. No matter if you are using 2, 3, 4 or 5 threads: The great variety of professional stitch types lets you accomplish several steps in one easy operation. Latest technology ensures highest sewing convenience with impressive results. Remarkably more beautiful, time-saving sewing – what else does a passionate sewer's heart desire?

Differential Feed

Fine fabrics tend to pucker during sewing while terrycloth and knit fabrics tend to fray. Elastic fabrics often stretch out, with unwanted wavy effects. The differential feed eliminates it all! It is fully adjustable to ensure even feeding of all fabric types. Of course, it lets you produce trendy lettuce edge finishings or easy gathering effects, if needed!

No longer without differential feed: It guarantees perfect seams – always!

Little details that make a big difference:

Sewing Speed
Sews up to 1,300 stitches per minute

Easy Threading
You can't go wrong: Thanks to color-coded lay-in tensions and threading paths

Auto Tension System
Simply fantastic: Every stitch program has a pre-set thread tension

Program Selection Dial
Simply turn this handy dial for fast stitch program selection

Stitch Length Adjustment
Through external dial – stitch length of 1-4 mm

Adjustable Presser Foot Pressure
For perfect seams and no marks on fine fabrics

Sew with up to 3 needles
For highly elastic, durable seams that last a lifetime

Differential Feed
For perfect seams on all materials!

Cutting Width Dial
For easy seam width settings

Extra-High Presser Foot Lift
Offers extra clearance needed for placing bulky or multiple fabric layers under the presser foot

Movable Upper Knife
Cuts fabric for 5-7 mm stitch width. If needed, it can easily be disengaged!

Stitch Diagram on Machine Front
Everything at a glance: An easy-to-follow diagram makes selection of stitch programs and respective machine threading an easy task!

Auto Tension System

From highly stretchable seams to fine rolled hems: There is a different thread tension to each stitch type – for guaranteed perfect results!

It's so easy with the SINGER® QuantumLock® – thanks to the machine's Auto Tension System. Simply turn the program selection dial to the respective letter shown in the stitch diagram on the machine front, and the QuantumLock® is ready for sewing the selected stitch with a pre-set thread tension. If you're working with extremely delicate fabrics, you can also make easy manual adjustments.

Fabulous Piping/Cording

Piping/Cording Foot

Piped edge finishings not only give seams on heavy fabrics extra strength and durability – they're also just great-looking trimmings! For upholstery, cushions, bedlinen, and much more.

Decorative Ribbons and Tapes

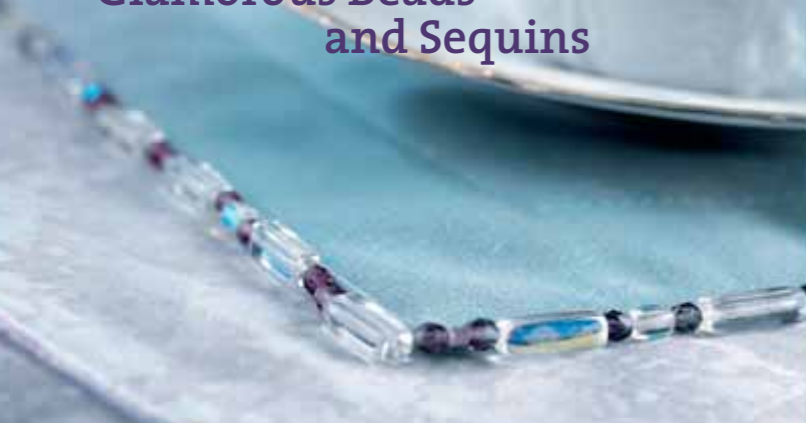

Taping Foot

Attaching decorative ribbons, or seaming knit fabrics and simultaneously attaching tape for extra stability: The taping foot takes care of it all, in one single step. An absolute must-have!

Beading Foot

Dazzling decorative effects can be achieved in no time, with endless strings of pearls, beads and sequins that are simply inserted in the beading foot's guide. And off you go!

Glamorous Beads and Sequins

Optional Presser Feet

Dream seams don't end here!

Can you imagine being able to master even intricate sewing techniques conveniently in one simple step? Thanks to clever specialty feet of the SINGER® QuantumLock® you can let your imagination run wild. Exquisite decorative effects, fancy embellishments and special finishing techniques can easily be achieved on the QuantumLock® – with equally fast and professional results.

The optional presser feet of the QuantumLock® 967 are true, time-saving multi-talents. There's no better way, for example, for gathering, finishing and seaming fabrics in one simple operation. Or, for neat and durable attachment of highly-stretchable elastics that'll never wear off. Take a closer look at each specialty foot – you'll be stunned by a serger's tremendous versatility.

And rest assured: Every specialty presser foot is incredibly easy to use and a snap to change!

Seams that stretch with you!

Elastic Foot

It's so easy to attach or insert elastic into a seam: For highly stretchable seams on sportswear, swimwear, lingerie, etc.

Nostalgic Gathering/Shirring

Shirring Foot

Gathering, finishing and hemming in one simple operation! The specialist for adding a nostalgic touch to fashion, doll's clothes or home textiles also produces beautiful ruffles.

Blind Hem Foot

Like handsewn – and finished simultaneously! With the blind hem foot it's fast and easy to sew durable classic blind hems on woolen and knit fabrics.

Invisible Hems
